Forlag i fosterstilling

Kan de store norske forlagshusene virkelig være så dumme at de forsøker å tviholde på bokhandlerne helt til ingen av dem lenger eksisterer?

Herodes Falsk

Publisert: 06.01.2012 (12:12) Oppdatert: 06.01.2012 (12:12)

Som bokelsker har jeg veggene dekket av bokhyller fulle av beker, men i det siste året har jeg gått over til lesebrett. Jeg har kjøpt hundrevis av engelske e-bøker fra Kindle og iBooks, lykkelig over at det ikke tar mer enn ett minutt å laste dem ned. Prosessen og løseropplevelsen er helt fantastisk! Siden jeg selv er forfatter og har utgitt en e-bok på et stort norsk forlag, ble jeg betutt over all avisskrivningen om hvor vanskelig det er å kjøpe norske e-bøker. Derfor bestemte jeg meg for å

Michael Staton, Run a start-up focused on Higher Ed. ...

The actual biggest innovation in online learning isn't an innovation, it's the ACCEPTANCE of online learning. Any numbers of studies have been published that show online learning can be as effective as in the classroom, and hybrid classroom/online models can be more powerful than just the classroom. The unimpressive reality is that much of what is called "online learning" is just a course delivered online through a relatively mundane Learning Management System (ala Blackboard, eCollege.) It's taken so long for this to be accepted, that this acceptance is the primary driver in the market of innovation right now.

There's one other preface - the INTERNET is the innovation that matters, no matter the product or content. It gets information and capabilities into the hands of people. We're all just waiting around for the right products to come along to make it easier than reading the entire Internet.

So, let's take for granted an ACCEPTANCE of online learning, and that with the Internet nearly anything is possible. There's a number of really amazing things that are happening:

Scaling School
There are a handful of companies, the most hyped being 2tor, that are taking schools online and doing all the marketing and program development, providing the software and the human resources, and taking an enormous margin off the top. The biggest online k12 school is Florida Virtual, but it's a state run school.

Social Learning
1. Networks of peer-to-peer learning. My favorite example is the kids on YouTube teaching each other music and songs, and the little cooking shows on

Strykprosentene i de helt grunnleggende matematikkfagene på Gløshaugen steg til nye høyder i fjor høst. Studentene sliter seg gjennom starten på studiene.
Massestryk i matte blant BI-økonomer

Nesten halvparten av andre års masterstudenter i siviløkonomi ved BI strøk da de gikk opp til skriftlig eksamen i matematikk før jul. Nå får de gå opp på nytt, men det koster dem en snau tusenlapp.

Johnny Gimmestad

Det ble ramaskrik blant de vordende siviløkonomene på Handelshøyskolen BI i Nydalen, da resultatene fra eksamen i matematikk forelå rett etter årsskiftet.

Av 270 studenter som gikk opp til eksamen, var strykprosent på 49,8%.

Strykprosenten på elleve av de tolv økonomer har vært over 40%, men det er ikke forårsaket av at det er mange unntakspel. Det er en siste rettelse i siviløkonomisk trikorg.

Great flat, fantastic! Great Value for an absurdly expensive city! :) Highly recommended.

November 2012

Christian’s place was perfect for our family. The location is very central and Christian was extremely helpful during our stay. I highly recommend Christian’s apartment for anyone who wants to visit Oslo.

The apartment is quite an easy walk from Oslo S station, but not if you follow well meaning but inaccurate directions from passers-by. Turbinveien is a very new development (Oct 2012) and even locals did not know where it is. However, ask for Kvænerbyen (#32 bus) and you will find yourself close to Turbinveien. The Krøchs' apartment is very comfortable and Christian did everything possible to make us welcome. Its location is perfect for exploring Oslo. Like any major centre Oslo has a number of well advertised tourist attractions which can be rather expensive. However, with a little research and giving yourself some time for orientation, there is a great deal to see which costs little or nothing.

It was our first experience with Airbnb and we'll repeat it for sure next time! The flat was very comfortable, warm, fully equipped and clean. Just a few minutes by bus to the city centre. It was also very quiet despite building work opposite. We did not meet the owner but they gave us all the information we needed and more was in the flat. Over all a great experience. Thanks

Study Shows Airbnb Is Good for San Francisco, Says Airbnb

- 60 percent of San Francisco Airbnb hosts make below the median income for the area.
- 56 percent say they use their income from Airbnb to pay their rent or mortgage.
- 20 percent of Airbnb hosts are freelancers, compared to 8 percent of the San Francisco population.
- Airbnb guests spend $1,100 per San Francisco visit, compared to $840 for hotel guests.
- 60 percent of that spending is in the neighborhoods where guests stay, and Airbnb guests stay all over town instead of just in the main tourist districts.
- Over the past three years, the San Francisco hotel occupancy rate and average daily rate are both trending upward.
Airbnb Launches Free Temporary Housing for Sandy Survivors in New York

By Leon Kaye | November 9th, 2012 | 0 Comments

With over 100,000 people still homeless a week after Hurricane Sandy hit the Northeast, the situation has become more dire as more bad weather hits the Atlantic seaboard. To that end, Airbnb launched a program with the City of New York to connect those without shelter to people who have extra space.

The system works just the same as when travelers are looking for a place to stay when they are on the road. Users can navigate through Airbnb’s search engine and find available spaces. For hosts, they still are protected by Airbnb’s $1 million host guarantee insurance policy, and they can be as flexible with their availability as they need to be until the program ends on November 30.

Naturally one important question of this Hurricane Sandy relief effort comes up: how do hosts know for

What is FLVS?

We're glad you asked! Florida Virtual School is a public school but, as you can probably tell, we're not just any public school. We're online. This means no matter where you live you can access more than 120 courses, from Geometry to AP Art History and everything in between. What's more, our courses are just as real as the dedicated, certified teachers who teach them. FLVS is where you go to learn on your time and on your schedule, no matter what kind of student you are. Public, private and homeschooled students, from kindergarten-12th grade, can take our virtual courses whether they live in Florida or not.

Just getting started with online learning? We're here to help! For more information about FLVS and the virtual learning programs available to you, click here to learn more, or just give us a call.

- **Recognize leaders.** Engage and reward your most valuable members.
- **Give back.** Provide tangible incentives and rewards for achievements and member activities.
- **Differentiate.** Add motivation tools to your programs, products and services.
A Sandbox for Learning: SimCityEDU

Source: Joan Ganz Cooney Center, Posted: Mar 13, 2013

I'm old enough (or young enough, based on whom you ask) to have fond memories of experimenting with both SimCity 2000 and SimCity 3000, the first two sequels to Will Wright's popular SimCity game. The ability to design and wreak havoc on my own community offered mixed feelings of power and helplessness that, as a 9-year-old, I would have had few opportunities to experiment with beyond the computer. My mother, an urban planner, would use my city's pitfalls as a springboard to discuss broader questions of resource management and city design. So it is exciting to me that a new generation of students will be able to experience the game's educational value in SimCityEDU.

SimCityEDU Aims to Teach Kids a Thing or Two

SimCity creators have launched a new in-classroom learning experience that engages kids, and works with teachers to impart core curriculum. The monumentally popular world-building video game of yore, SimCity™, has put on a fresh coat of paint in the name of education, according to KQED website. The maker of SimCity, Electronic Arte, has teamed with the Institute of Play's GlassLab to create a game that they hope will capture the imaginations and drive of middle-schoolers.

Upcoming Hangout: What Does SimCity-based Curriculum Look Like?

Welcome to SimCityEDU

Engage your students by using the SimCity™ game to make learning come alive! Create and share game-based learning tools that address a wide range of subjects including science, math, civics, economics, and more.

As game-based learning gains momentum in education circles, teachers increasingly want substantive proof that games are helpful for learning. The game-makers at the non-profit GlassLab are hoping to do this with the popular video game SimCity.

Want to program a self-driving car? Stanford’s AI guru says he can teach you in seven weeks

By David Cardinal on January 23, 2012 at 5:45 pm | 3 Comments

After leading Stanford’s robotic car effort to first and second place finishes in the DARPA challenge, and launching the now famous Chauffeur project at Google, Sebastian Thrun broke more new ground by teaching a Stanford computer science course online to 160,000 students last fall. After his invitation for anyone, worldwide, to audit the course went viral, registrations went through the roof.

Inspired by the class’s success (248 students achieved perfect scores — none of them enrolled at Stanford), Sebastian has taken online education to the next level, starting a free online “university” named Udacity, through his startup, Know Labs. For now, Udacity only has two classes, but they are both likely to be very popular.

Kognitivt overskudd
Vi har ledig tid og teknologi til å koordinere nye typer aktiviteter - kognitivt overskudd fra alle i verden!

100 millioner timer for å skape alt innhold i Wikipedie
200 milliarder timer TV-kikking i USA i løpet av ett år alene
**Kognitivt overskudd**

Vi har ledig tid og teknologi til å koordinere nye typer aktiviteter - kognitivt overskudd fra alle i verden!

Gir oss muligheten til å løse nye/andre problemer enn tidligere

100 millioner timer for å skape alt innhold i Wikipedie
200 milliarder timer TV-kikking i USA i løpet av ett år alene
- krever ingen revolusjon altså, bare at noen bruker noe av sin tid, før man kan få store effekter. Det er fordi det kognitive overskuddet er så enormt, at mye kan endres bare ved at vi bruker bittelitt tid
Mange -- utrolig mange -- mennesker bruker litt av sin tid og effekten blir enorm

Tok ikke lang tid før printteknologien var tilgjengelig før den første erotiske trykket var der. Det var dette folk ønsket. Tok enda 150 år før det første vitenskapelige publikasjonen kom

Vi får ikke de virkelige verdiene ut av internett før noen sier at de skal gjøre det - håper ikke det tar 150 år denne gangen.
Ja, ja – Det var vel slutt på unggarslivet da
Hva skjer?

- PLN skaper oppmerksomhet om hendelsen
- Teknologi gjør at jeg kan se når jeg vil
- Stoppe – ta notater – bilder
- Refleksjon
  - Kan jeg bruke dette til noe?
  - Hvordan passer det inn med det jeg kan fra før?
  - Er det nye eksempler eller forklaringsmodeller?
- Ny arbeidsform
- Ny nettbasert læreform
Teknologi blir **usynlig**

- Maler og skript
- Skaper nye arbeidsprosesser
- Gir nye muligheter for å skape kunnskap, formidle (medier), kommunisere, lære, oppleve, og hva ...
Kan vi planlegge oss til suksess?
Please sit down to pee

Damn Women!
Takk for oppmerksomheten!
